ADVANCED ENGINEERING FROM GERMANY

laundry

how to use this brochure

The first section of the brochure describes the specialised range of wash programmes we have developed for exceptional fabric care, reflecting our passion for perfection. You can also read about the many practical features which make AEG laundry products so easy to live with.

Detailed profiles of individual products follow, with features logically grouped together in horizontal sections for ease of comparison.

To help you choose exactly the right model for your home, we have included product selector charts for both washing machines and tumble dryers. These make it easy to identify machines with the particular features that you want.

Finally, a detailed specification table provides all the technical information that may be necessary to resolve any remaining pre-installation issues.

Every AEG laundry appliance represents the very best in Advanced Engineering from Germany. Read on, and you'll discover why...

passion for perfection

ENGLISH NATIONAL BALLET

"Our wardrobe care needs to be as technically precise as our performances on stage", says English National Ballet's Chairman, Angela Rippon.
"Using AEG products in our wardrobe department ensures that we achieve the highest quality performance off-stage as well as on."

Welcome to the very latest range of washing machines and tumble dryers from AEG. These superbly engineered appliances are designed to take extra special care of all your clothes, using technology which is efficient, economical and quieter by design.

AEG's passion for perfection is reflected in our uncompromising and innovative approach to the pursuit of excellence... a passion which is shared by English National Ballet – one of the world's leading classical ballet companies – whose dancers are world-renowned for their precision, strength and artistry.

With 64 dancers giving over 170 performances every year, English National Ballet demands the highest standards of care for its hard-working costumes, each of which is a valuable asset in its own right. This responsibility is entrusted to AEG's hard-wearing laundry appliances, which combine gentleness and energy efficiency with outstanding wash performance.

All AEG products are developed and manufactured with meticulous attention to detail, often embodying new ideas which are well ahead of their time.

To find out more about English National Ballet's performances visit www.ballet.org.co.uk or call 020 7581 1245.

AEG

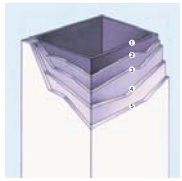
Whichever way you look at a LAVAMAT machine, its sheer capacity for excellence is impressive.

Each model has an **extra-large porthole door** measuring 30 cm in diameter. This opens right back to an angle of 165 degrees, making it easy to load and unload even the bulkiest laundry items.

Machines also have an impressive capacity of up to **6 kg,** allowing you to save water and electricity as well as time by washing more laundry in a single load. In addition, we have engineered the tubs of LAVAMAT machines from a new, highly durable material which supports super-fast spin speeds up to **1800 rpm** as on the LAVAMAT 88840. Such a high spin speed is so efficient at extracting water from your laundry that it can reduce tumble drying time by up to 26 minutes*.

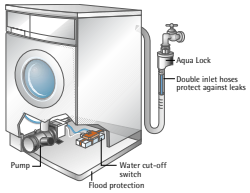
People who choose AEG appliances do so because they expect exceptional quality, reliability and a long service life.

Corrosion protection is one way in which we fulfil this expectation, using the same 'Sendzimir' multi-layer galvanising and coating process which is used on luxury cars. Because of this, the casing will not rust even if it is scratched, thereby retaining its good looks over many years. Another important factor is our choice of stainless steel for the drum, tub and heat element, plus strong, high quality components which are used throughout.



1. High quality steel
2. Special zinc coating
3. Phosphate protection
4. Paint coating
5. Surface paint coating

AEG's highly efficient **spin technology** also enhances durability. By extracting more water than many of its rivals (even at lower spin speeds) less strain is placed on the drum bearing - and, of course, this is better for your clothes.



The higher the spin speed, the greater the importance of level installation. LAVAMAT machines have adjustable feet, and models with spin speeds of 1400 rpm and above are fitted with a **unique spring-loaded automatic levelling device** which can compensate for floor unevenness of up to 1 cm.

Safety has always been a top priority for AEG. All our washing machines feature a special **child safety door lock** mechanism which stops the porthole door being closed by accident.

Aqua Control all-round water protection on all models provides peace of mind by minimising the risk of accidental flooding. Some machines also have an **Aqua-lock** which automatically switches off the water supply in the event of a leak. The Aqua-lock system is active when the machine is connected to mains power, and a warning signal alerts you when it has been activated.

*Compared to our 1000 rpm spin speed model. Based on a standard 5 kg cotton load, tumble drying to cupboard dry temperature using AEG appliances.

care and convenience to suit your lifestyle

Our latest laundry appliances offer 'total adaptability' to meet the demands of modern lifestyles.

Knowing our customers, we fully understand the time pressures that affect their everyday lives, as well as the substantial investment which they make in buying clothes.

Today's AEG consumers need products which readily adapt to their most exacting individual requirements. This has led us to add even more time-saving options and fabric care programmes to our laundry range.

Our products now offer greater convenience and flexibility. Not only are they designed to help you manage your time in the most effective way possible, but they also provide specialised care for the most expensive and delicate items in your wardrobe. With an AEG laundry appliance, you can be sure that your precious garments will stay in pristine condition - even when you wash them again and again.

new programme options that put you in control

For AEG, 'total adaptability' means appliances that fit in perfectly with your lifestyle. One of the ways in which we have achieved this is by introducing a new range of time-saving programmes on our latest laundry products - programmes which maximise convenience to help you manage your busy domestic schedule more effectively.

NEW family friendly 6 kg capacity

The new LAVAMAT 86741 washing machine and 16810 washer dryer both have generous capacity for a full 6 kg wash load, which is ample for the needs of larger families.
Both models achieve an 'A' rating for wash performance, ensuring the very best results every time.

NEW Rear illuminated control panel

The control panel of the new LAVAMAT 88840 is brightly illuminated from the rear, making it particularly easy to read.

NEW triple LED display*

Washing machines with three LED display panels provide a wealth of useful information:

- The first LED indicates the spin speed for your selected washing programme, prompting you to select a speed reduction option if required.
- The second LED provides two useful measurements. At the start of your wash, a 'Moisture %' measurement is displayed, indicating how damp the load will be on completion of the cycle - useful for determining the length of tumble drying time that will be required. At the end of the cycle, a 'Loading %' measurement then shows whether you have under-loaded the machine. Experience tells us that most people do not make full use of their machine's capacity, so this will help you 'get a feel' for the amount of laundry you can load.
- The third LED displays delay start programming, and also how long your current wash programme will take to complete.

* Available on LAVAMAT 88840 only

NEW

TIME SAVER

For example, our new **Time Saver option** gives you the flexibility to reduce the overall duration of your chosen programme by a quarter or a half, speeding up the wash cycle when time is of the essence.

NEW

REFRESH PROGRAMME

This facility is complemented by our unique **Refresh programme** which completes a full wash and rinse cycle in only 20 minutes. Ideal for freshening up garments which have been worn only once or twice. Refresh represents the ultimate in convenience for busy households, and its gentle action ensures exceptional fabric care.

NEW

INTELLIGENT LOAD MIXING

When you're in a hurry, the last thing you want to do is sort your laundry into separate cotton and synthetic loads. AEG's new **Intelligent Load Mixing** facility solves the problem by analysing the make-up of a mixed load and switching to the most suitable wash programme automatically. This allows you to wash a mix of cotton and synthetic fabrics with confidence, knowing that none of your precious garments will be harmed.

Recognising how much AEG customers value their fine clothes, we have extended the concept of 'total adaptability' to encompass a wide range of additional programmes for specialised fabric care.

NEW

FASHION PROGRAMME

These include our new **Fashion programme** which is specially designed for fashion fabrics made from cellulose fibres (such as viscose) that are particularly susceptible to shrinkage and pilling. This programme provides the gentle care these fabrics need, enabling you to wash them regularly without spoiling their good looks. What's more, if a different fabric comes to the fore in future years, it will be possible to adapt this dedicated programme using AEG's microprocessor update facility.

NEW

SENSITIVE PROGRAMME

To meet the needs of young family members or those with sensitive skin, allergies or eczema, AEG's new **Sensitive Rinse option** adds extra water and rinse cycles to your chosen programme, maximising rinse performance whilst reducing mechanical action. This is designed to minimise skin irritation.

NEW

ENERGY SAVING PROGRAMME

Finally, if you want to do as much as you possibly can to help the environment, the new **Energy Saving programme** on AEG machines achieves the optimum wash performance with the lowest possible energy consumption.

Please refer to the product profiles and product selector chart to see which models have the programmes and features that you want.

outstanding performance from our latest washer dryer

The new LAVAMAT TURBO 16810 washer dryer sets new standards for performance and convenience, achieving a breathtaking **30% reduction in drying times.** This impressive 1600 rpm spin machine now offers super-fast condenser Turbo-drying on top of 'A' rated wash performance, maximising savings in both time and money.

It's 'family friendly', too, with capacity for an impressive **6 kg wash load** (or 3 kg wash and tumble dry). In addition, its **extra large 30 cm diameter porthole** door opens right back to an angle of 165 degrees, making loading and unloading easier than ever before.

NEW sensor programmes for AEG tumble dryers

Four new options have been added to the range of electronic sensor programmes now available on all our tumble dryers. Designed for maximum convenience in keeping with your lifestyle, each has been developed to optimise fabric care.

The **Refresh** programme lets you take full advantage of all the newly available dry cleaning products which enable you to freshen 'dry clean only' and 'hand wash' garments in your tumble dryer at home. Not only does this cut down on time-consuming visits to your local dry cleaners, but it will save you money too!

Easy Iron is another new tumble drying programme, unique to AEG, which cuts down on the chore of ironing by minimising fabric creasing. This ultra-sensitive drying cycle is the perfect complement to the Easy Iron programme on our washing machines.

To keep your woollens soft and fluffy, use the new **Wool Care** programme which is designed to loosen the fibres of woollen garments after they have been line-dried in the open air. This programme is also ideal for refreshing woollens which have been stored in a drawer or wardrobe for any length of time.

Finally, there is a new **Intensive Dry** setting for tumble-dried clothes which are ready to wear straight from the machine. Perfect for those times when you just can't wait for your laundry to be aired, this programme also gives the best possible drying performance for multilayered textiles such as duvet covers.

concern for your environment

Functional design plus enhanced capacity, spin speed and programme selections put AEG's latest LAVAMAT washing machines **in a class of their own,** delivering outstanding wash performance and energy efficiency.

Maintaining a peaceful home environment is a top priority for AEG. From experience, we know how distracting the noise from domestic appliances can be, which is why our LAVAMAT machines have been **meticulously engineered for whisper-quiet performance.** In fact, our top model emits as little as 46 dB of noise, even when spinning. This means you can readily take advantage of off-peak electricity tariffs by doing your washing at night.

Every LAVAMAT machine is also designed for economy, **using minimal quantities of water, electricity and detergent.** This helps to care for the environment as well as saving you money on a daily basis.

In addition, our **'cradle to grave'** environmental policy minimises the ecological impact of each appliance at each stage of its life, from manufacture to disposal.

total adaptability to suit your lifestyle

Turn

Just select the type of wash programme you require (e.g. 60°C cotton) and press your chosen wash options.

Press

Then press Start.

and Go

You can leave everything else to the machine. It's so easy that you will find yourself using a wide range of different programmes with confidence.

A four-stage dispensing system ensures that water softening agents, detergent, in-wash stain removers and fabric softeners are all dispensed at exactly the right time.

Pre-wash and soaking options cope with the heaviest soiling.

Time Saver option gives the flexibility to reduce wash time by a quarter or a half.

Stain-Action is a unique function which optimises the effectiveness of in-wash stain removers.

Spin reduction options enable you to tailor the spin speed to suit your requirements.

Three LED displays show spin speed, how dry your laundry will be, how much of the drum's capacity has been utilised and how long the wash will take to complete.

Programme progress indicators show what stage your programme has reached.

Detergent overdosing light warns you if you are using too much detergent in your washes.

A delay timer function enables you to set a programme start time up to 19 hours in advance.

Large 30 cm diameter porthole makes loading and unloading easy.

Bright interior light makes it easy to see if small items such as socks have been left in the machine, helping to avoid the risk of accidental colour runs.

Child safety door lock mechanism stops the porthole door being closed by accident.

special care for all your clothes

No matter how delicate or heavily soiled your laundry may be, LAVAMAT machines put exactly the right programmes at your fingertips. In addition to the standard selection of programmes, they also offer specialised wash options for exceptional laundry care.

Every machine features AEG's **VARIOMATIC® spin system** which keeps creasing to a minimum by interspersing progressively faster spinning with frequent tumbling stages. This ensures that clothes not only dry quickly but are also wonderfully easy to iron.

Sensortronic foam detection will detect if you have put in too much detergent, adding extra rinses to ensure perfect wash results.

STAIN-ACTION PROGRAMME

The unique **Stain-Action programme** on all models is designed to optimise the effectiveness of in-wash stain removers. Because these products work better at higher temperatures than those recommended for main wash detergents, the programme comprises a two-stage detergent dosing process. The main wash detergent is released while the water is at a relatively low temperature, then stain remover is added later when the temperature has risen.

WOOL-CRADLE PROGRAMME

All LAVAMAT machines also have a **super-gentle wool programme** called the Wool-Cradle which gently rocks your woollens to and fro – it would be hard to take greater care when washing by hand! The wash temperature is limited to a safe 40°C, and a gentle spin eases the rinse water out of the clothes.

HANDWASH PROGRAMME

AEG's innovative **Handwash programme** allows 'hand wash only' garments such as silks, woollens and other delicates to be safely washed at up to 40°C.

SILK PROGRAMME

The **Silk programme** is a new 30°C cycle which is specially designed for silk items. It provides a very gentle wash for loads up to 1 kg, spinning once only at the end.

NEW

SENSITIVE PROGRAMME

Perfect for those with young or sensitive skin, the **Sensitive rinse option** is a gentle programme for everyday use which adds extra rinse cycles while reducing mechanical action to prevent agitation to skin.

EASY-IRON PROGRAMME

The **Easy Iron programme** minimises the creasing of all types of easy-care fabrics, thereby reducing ironing time by up to 50%.

NEW

FASHION PROGRAMME

Fashion is a special programme for fashionable textiles made from cellulose fibres, e.g. Viscose. Its gentle and efficient action prevents damage such as shrinkage or pilling to these susceptible types of fabrics – maintaining the 'just bought' appearance without dry cleaning or handwashing.

NEW

REFRESH PROGRAMME

Where time is of essence, the unique **Refresh** programme is a full wash cycle that takes **just 20 minutes.** It's gentle on your clothes and prevents excessive wear and tear – ideal for sportswear or smoky textiles.

Please refer to the product profiles and product selector chart to see which models have the programmes that you want.

laundry in the fast lane

NEW

INTELLIGENT LOAD MIXING

Intelligent load mixing on selected models takes the guesswork out of washing cottons and synthetics. No pre-sorting is required – the cycle is automatically adjusted according to the textiles, and mixed loads can be washed with the reassurance that fabrics won't get damaged.

NEW

TIME SAVER

For added convenience, the **Time Saver** option allows you to reduce the duration of your chosen programme by a quarter or a half.

All models have **Pre-wash soaking options** to cope with the heaviest soiling.

QUICKWASH PROGRAMME

The **Quickwash programme** makes brisk work of lightly soiled laundry. The Quickwash programme reduces wash times by up to 50% - ideal for busy households.

NEW

ENERGY SAVING PROGRAMME

The **Energy Saving Programme** offers best wash performance with lowest energy consumption.

advanced technology for outstanding results

All LAVAMAT machines have been designed to combine powerful cleaning performance with outstanding fabric care, efficiently removing the toughest dirt whilst gently handling delicate garments. Whatever your lifestyle, you can rely on AEG's advanced laundry technology to achieve superb wash results using the least possible water and electricity.

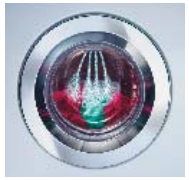
Fuzzy Logic programming provides built-in intelligence which controls the main wash water intake, wash temperature and rinse performance. It even re-distributes the load before the final spin, which is kinder to your clothes as well as the machine.

On top models, **Advanced Fuzzy Logic** is even more effective at delivering optimum wash performance using the minimum possible resources. It achieves this by accurately measuring the amount of laundry you have loaded and memorising it to establish the exact amount of water needed for the rinses as well as the main wash. It also learns from past experience, intelligently memorising programme adjustments to minimise running costs.

AEG's **foam suppression system** helps to minimise the volume of water required for rinsing.

Our special **ECO-lock valve** ensures that no undissolved washing powder is trapped in the drainage system of the washing machine, thus ensuring no wastage. This feature also reduces pollution by ensuring that undissolved detergent does not find its way into the natural environment.

Top models feature **Advanced Rinse Technology** which wets laundry as quickly as possible in order to prevent the unsightly 'pilling' which can occur when friction builds up between dry items. This is achieved by spraying the clothes with jets of water.



The **Update Facility** on top models means that the Fuzzy Logic microprocessors can be updated to keep up with changes in washing technology. For example, tomorrow's fabrics and detergents may have different requirements in terms of water quantity, wash temperature or cycle time. If this happens, your washing machine can be reprogrammed by an AEG service engineer.

Advanced Fuzzy Logic models with an LED screen offer additional benefits.

Firstly, the display screen provides a useful **countdown time facility** which shows exactly how long your wash will take to complete.

Secondly, it enables you to set a **delayed start time** for your wash, which can be anything up to 19 hours - ideal if you want to take advantage of off-peak electricity rates, or do the laundry while you are out.

I lead a particularly busy lifestyle. Will an AEG washing machine save me time?

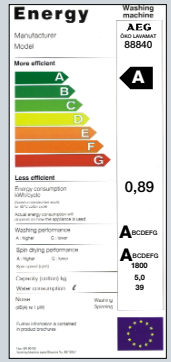
The Time Saver option gives you the flexibility to reduce the overall duration of your chosen programme by a quarter or a half, speeding up the wash cycle when time is of the essence. Alternatively, the Quickwash programme is also ideal for busy households, reducing wash times by up to 50%.

The LED screen also assists with **diagnostic fault-finding.** Should any problem occur with your machine, a fault code will be displayed. If the fault is not one which you can rectify yourself, the code can be phoned through to AEG's service reception, enabling a forewarned service engineer to fix it without delay.

The LAVAMAT 88840 has three LED display panels providing a wealth of useful information, described fully on page 6.

EU energy labelling

Over the years, the consumption figures for our laundry appliances have fallen dramatically, with today's models using on average 72% less water and electricity than those we manufactured in 1978. This is due to the use of advanced microprocessor technology which optimises wash performance at every stage whilst keeping consumption to an absolute minimum. In fact, our current top of the range LAVAMAT 88840 machine uses just 39 litres of water and 0.89 kWh of electricity to wash a 5 kg cotton load.



We have designed this brochure so that you can easily see the EU energy rating for each machine and compare it with others.

The outstanding performance of LAVAMAT machines is evident from the ratings they have achieved under the EU's Energy Efficiency labelling scheme. This scheme offers consumers a standardised method of assessing a machine's efficiency, washing and spin drying performance ('A' - most efficient, 'G' - least efficient). All our washing machines achieve an 'A' rating for both energy efficiency and wash performance, while the LAVAMAT 88840's triple 'AAA' rating reflects its spin drying excellence, too.

We recommend the Ariel range for outstanding cleaning and fabric care.

tumble dryers

AEG

What type of tumble dryer should I choose?

This depends on the method by which you want to disperse the moisture from your laundry. In vented models, hot air is used to absorb moisture which is discharged through a venting hose to the outside air. Condenser dryers require no venting, as moisture is collected in a spill-free container (or pumped out using optional drainage coupling) – this type of dryer can simply be plugged in to the nearest power socket offering greater flexibility for installation.

Optional stacking kits are available enabling a tumble dryer to be stacked above your washing machine in order to save space.

An AEG LAVATHERM tumble dryer is the perfect complement to your LAVAMAT washing machine, with the same easy-to-read control panel and 'one button/one function' operation.

Electronic sensors continually monitor the dampness of your laundry, shutting off the hot air heater as soon as the required level of dryness has been reached. As well as ensuring perfect drying results, this also prevents over-drying and excessive energy consumption. A separate **manual timer** is also provided.

Setting the right drying programme is easy: simply select the fabric type and how dry you want the laundry. The machine will continue running until the chosen level of dryness is reached. A **delay timer function** allows you to set a start time in advance.

Each model has capacity for up to 5 kg of laundry in its **generously proportioned drum,** which has a large 36 cm door opening to make loading and unloading easy.

In **condenser models,** moisture is collected in a large 3.8 litre water container which is self-sealed for spill-free emptying. Alternatively water can be pumped into an adjacent drain or sink using the optional drainage coupling. In **vented tumble dryers,** it is discharged through a pipe to the outside air.

All models utilise a **reverse tumble action** to reduce creasing by loosening the clothes as they dry.

If the washing is not immediately removed at the end of the drying cycle, the machine will enter a 30 minute cooling phase in which **clothes are periodically lifted and moved** to keep them fluffy and virtually crease-free.

There is an **easy-clean fluff filter** which is accessible from the front of the machine. For safety reasons, the machine will not operate unless this is in place.

For maximum flexibility, doors can be hinged on the left or right, and top models have a **child safety door release mechanism.**

Please refer to the product profiles and product selector chart to see which models have the features you want.

4 new electronic programmes

NEW

REFRESH PROGRAMME

The **Refresh** programme lets you take full advantage of all the newly available dry cleaning products which enable you to freshen 'dry clean only' and 'hand wash' garments in your tumble dryer at home. Not only does this cut down on time-consuming visits to your local dry cleaners, but it will save you money too!

NEW

EASY-IRON PROGRAMME

Unique to AEG, **Easy Iron** offers special sensitive drying, to reduce creasing and minmise ironing. (Works perfectly with AEG's Easy Iron wash programme.)

NEW

WOOL CARE PROGRAMME

The **Wool Care programme** achieves softer woollens by using warm air in the dryer to loosen woollen fibres after air drying. Woollen clothes that have been stored in the wardrobe can also be 'refreshed' using this programme.

NEW

INTENSIVE DRY PROGRAMME

Our **Intensive Dry** programme increases the degree of dryness available, and is particularly useful for multilayered textiles, e.g. duvet covers.

Moisture from your laundry is collected in a large 3.8 litre water container which is self-sealed for spill-free emptying. The container is integrated in the control panel, so you will not need to bend down

LED display indicates how long the drying cycle will take to complete, based on the degree of dryness reached

An audible signal is given when the drying cycle is completed

Progress indicator lights show how dry your laundry has become

Single programme selector knob allows you to select the required dryness for particular fabric types

Warning lamps advise you of any day-to-day maintenance required

A delay timer function enables you to set a programme start time up to 19 hours in advance

Interchangeable door hinging gives you the flexibility to have a right- or left-hand opening door

washer dryer

When space is at a premium and you need a tumble dryer as well as a washing machine, choose the latest washer dryer from AEG. This combines many of the best features of our renowned LAVAMAT washing machines with those of our sophisticated LAVATHERM dryers to meet your specific needs.

The new LAVAMAT TURBO 16810 washer dryer with Advanced Fuzzy Logic sets new standards for performance and convenience, achieving a breathtaking **30% reduction in drying times.** This impressive machine now offers super-fast condenser Turbo-drying on top of 'A' rated wash performance.

With an impressive extra-large capacity for **6 kg of laundry,** the LAVAMAT TURBO 16810 will save you time and money by washing more clothes in a single load. This machine has a powerful **top spin speed of 1600 rpm** which not only minimises drying time but also saves money when tumble drying. A flexible choice of spin speeds from 400 - 1600 rpm allows you to achieve superb results every time.

This model offers a comprehensive range of programmes, including **Quickwash, Wool-Cradle, Handwash, Easy Iron** and **Stain-Action** as described earlier in this brochure.

Advanced Rinse Technology enhances fabric care, while **VARIOMATIC** spin technology leaves your laundry tangle-free and needing only minimal ironing. The tumble cycles end with a cool-down phase to keep clothes fluffy and minimise creasing.

Easy-to-read controls make selecting the right programme simple, and there is also a wash stage indicator to show you exactly how long your chosen programme will take to complete.

Easy to load and unload, the washer dryer has **an extra-large 30 cm silver porthole door,** opening right back to an angle of 165 degrees.

For the ultimate in washing and drying performance, choose the LAVAMAT 88840 with Advanced Fuzzy Logic intelligence. With capacity for a 5 kg load and a super-fast spin speed of 1800 rpm, it will get through your laundry efficiently and quickly, saving you up to 26 minutes tumble drying time*. This triple 'AAA' rated machine is the very best you can buy.

*Compared to our 1000 rpm spin speed model. Based on a standard 5 kg cotton load, tumble drying to cupboard dry temperature using AEG appliances.

LAVAMAT 88840

English National Ballet demands the highest standards of care for its hard-working costumes, each of which is a valuable asset in its own right. This responsibility is entrusted to AEG's laundry appliances, which combine gentleness and energy efficiency with outstanding wash performance.

'AAA' rated with 1800 rpm spin and NEW special care programmes

AEG

24+ wash programmes, including **NEW Intelligent Load Mixing** with **Time Saver** options for total convenience. **NEW Fashion and Refresh** programmes. **NEW Energy Saving** programme for best wash performance with lowest energy consumption. **NEW Sensitive** programme for those with young or sensitive skin and maximum gentleness for laundry. Special care programmes: **Wool-Cradle, Handwash, Silk Programme and Easy Iron. Pre-wash** and unique **Stain-Action. Advanced Rinse Technology** improves clothes care by reducing friction between fabrics. **Rinse-hold** facility and **VARIOMATIC** spin cycles minimise creasing for easier ironing. **'A' class spin efficiency: 1800 rpm top spin speed** for faster drying, with reduction options to 1400/1200/800/600/400 rpm.

Triple 'A' rating for wash and spin performance and energy efficiency. Advanced Fuzzy Logic intelligence maximises performance whilst keeping water, electricity and detergent consumption to a minimum. **Extremely quiet,** operating at a maximum of 46 dB(A).

Single knob, easy-read programme selection with 'one button/one function' operation. **19 hour delay start, detergent overdosing light. Fully illuminated control panel with 3 LED displays** showing programme time countdown, moisture levels and load capacity used.

30 cm extra wide chrome porthole with 165° door opening angle and **interior drum illumination** make loading and unloading easy. Generous capacity for a 5 kg load. Microprocessor **update facility** to meet changing programme requirements of new detergents and fabrics. **Automatic levelling system** and **adjustable foot** for stability and quiet operation. **Child safety** door lock mechanism. **Aqua Control flood protection** with **Aqua Lock** for total peace of mind. Optional stacking kit available for separate tumble dryer.

'A' rated energy class, using just 39 litres of water and 0.89 kWh electricity for a 5 kg cotton load (60°C cycle). Cold fill only.

For a detailed description of product features, see pages 4 – 17.

AEG

24+ wash programmes, including three special care programmes: **Wool-Cradle, Handwash, Easy-cares and Easy Iron. Pre-wash, Quickwash** and unique **Stain-Action. Extra rinse** option for young or sensitive skin. **Rinse-hold** facility and **VARIOMATIC** spin cycles minimise creasing for easier ironing. 1200 rpm top spin speed, with reduction options to 1000/900/700/400 rpm.

'A' class wash performance and energy efficiency. Advanced Fuzzy Logic intelligence maximises performance whilst keeping water, electricity and detergent consumption to a minimum. **Very quiet,** operating at a maximum of 52 dB(A).

Single knob, easy-read programme selection with 'one button/one function' operation. **19 hour delay start, detergent overdosing light. LED display** showing programme length and wash time remaining.

30 cm extra wide silver porthole with 165° door opening angle makes loading and unloading easy. Generous capacity for a 5 kg load. Microprocessor **update facility** to meet changing programme requirements of new detergents and fabrics. **Automatic levelling system** for stability and quiet operation. **Child safety door lock. Aqua Control flood protection** for total peace of mind. Optional stacking kit available for separate tumble dryer.

'A' rated energy class, using just 42 litres of water and 0.94 kWh electricity for a 5 kg cotton load (60˚C cycle). Cold fill only.

For a detailed description of product features, see pages 4 – 17.

Key features come as standard:

HANDWASH PROGRAMME

AEG's innovative **Handwash programme** allows 'handwash only' garments such as silks, woollens and other delicates to be safely washed at up to 40°C.

EASY-IRON PROGRAM

Easy Iron programme minimises the creasing of easy care fabrics – reducing ironing time by up to 50%.

ENERGY SAVE PROGRAMME

Best wash performance with lowest energy consumption. 'AA' rated programme.

AEG's **Turn, Press and Go** control panel is so easy to use Consumers find themselves using a wide range of different programmes with confidence.

A range of spin reduction options enables you to tailor the spin speed to suit your precise requirements.

LED programme progress indicators show exactly what stage your wash programme has reached.

An LED indicator lets you know as soon as it is safe to open the porthole door.

ENERGY B
WASH A

6 kg

ÖKO-LAVAMAT TURBO 16810

Easy to load and unload, the washer dryer has an extra-large 30 cm silver porthole door, opening right back to an angle of 165 degrees.

Washer dryer with family friendly 6 kg load, 1600 rpm spin and 'A' rated wash performance Now with 30% faster drying times

AEG

24+ wash programmes, including special care programmes: **Wool-Cradle, Handwash, Easy-cares and Easy Iron. Pre-wash, Quickwash** and unique **Stain-Action. Extra rinse** option for young or sensitive skin. **Advanced Rinse Technology** improves clothes care by reducing friction between fabrics. **BIO wash phase** maximises the performance of enzyme-based detergents. **Rinse hold facility** and **VARIOMATIC** spin cycles minimise creasing for easier ironing. 1600 rpm spin speed with reduction options to 1200/900/700/400 rpm

'A' class wash performance. Advanced Fuzzy Logic intelligence maximises performance whilst keeping water, electricity and detergent consumption to a minimum. **Foam suppression system** keeps water consumption to a minimum. **Sensortronic foam detection** adds extra rinses if you have added too much detergent, for perfect wash results. **Quiet,** operating at a maximum of 58 dB(A).

Single knob, easy-read programme selection with 'one button/one function' operation. **LED display** showing wash stage and drying time remaining. **19 hour delay start.**

30 cm EXTRA LARGE silver porthole with 180° door opening angle makes loading and unloading easy. Double-glazed porthole stays cool during tumble drying. **Generous capacity for a maximum 6 kg** wash load and 3 kg drying load. **Easy access fluff filter. Reverse tumble action** and **cool-down phase** minimise creasing for easier ironing. **Child safety door lock. Aqua Control flood protection** for total peace of mind.

Uses just 52 litres of water and 1.14 kWh electricity for a 6 kg cotton load (60°C cycle). Rinse-hold facility. **Condenser tumble drying** with reverse tumble action and cool-down. Cold fill only.

For a detailed description of product features, see pages 4 – 17.

LAVATHERM 57720

Condenser dryer with electronic sensors and NEW electronic programmes

12 electronic sensor programmes detect when required level of dryness has been reached, ensuring perfect results. **NEW special care programmes: Easy Iron, Wool-Cradle, Refresh and Intensive. Reverse tumble action** and **cool-down phase** minimise creasing for easier ironing. **Cold air option** is ideal for airing clothes.

Soft-line design with logically laid-out control panel including buttons for **Quick-dry programme** and **Special Care option.** Single knob easy-read programme selection. **Separate manual timer** for up to 40 minutes. **LED multidisplay** showing programme length and remaining drying time. LED drying stage indicator shows degree of dryness reached. **19 hour delay start. Audible/visual 'Programme end' indicators. 'Clean filter' and 'Empty water' indicator lights.**

Brightly **illuminated drum** and **large door opening** makes loading and unloading easy. Generous capacity for 5 kg load. Interchangeable door hinging gives flexibility to have left or right side opening door. **Child safety door release mechanism. Large 3.8 litre condensed water drawer** is self-sealed for spill-free emptying. **Easy-clean fluff filter.** Stainless steel drum. Optional drainage coupling. Optional stacking kit for installation with washing machine.

LAVATHERM 57520

built-in laundry appliances

If you want to make your washing machine or washer dryer an integral part of your overall kitchen design, choose a built-in model from AEG.

Stylishly unobtrusive, the LAVAMAT appliances featured overleaf can be fully integrated behind door panels in your kitchen. Installation diagrams are included to show you the exact space requirements for each model.

AEG offers a comprehensive range of built-in kitchen appliances, including ovens, hobs, hoods, microwave ovens, cooling and freezing appliances and dishwashers in addition to the laundry products featured here.

To find out more, please call our brochure line on **01252 669 643** to request a copy of our built-in brochure, or visit our web site at **www.aeg.co.uk**

LAVAMAT 10500VI

LAVAMAT 12700VIT

Washing machine with 1000 rpm spin and 2 special care programmes

24 wash programmes, including two special care programmes: **Wool-Cradle** and **Easy Iron. Quickwash** time-saving 30 minute mini programme. **Extra rinse** option for young or sensitive skin. **BIO wash phase** maximises the performance of enzyme-based detergents at low temperature. VARIOMATIC® spin cycles minimise creasing for easier ironing. 1000 rpm spin speed with reduction options to 900/700/500 rpm or no spin. Door opens instantly on completion of cycle, preventing creasing.

'A' class wash performance and energy efficiency. **Sensortronic foam detection** adds extra rinses if you have put in too much detergent, for perfect wash results.

Single knob, easy-read programme selection with 'one button/one function' operation. **Delay start** option. **LED display** showing programme stage and wash time remaining.

Generous capacity for 4.5 kg load. **Aqua-Control flood protection** for total peace of mind. Easy access fluff filter with indicator light.

'A' rated energy class, using just 40 litres of water and 0.85 kWh electricity for a 60˚C wash cycle. Cold fill only.

Washer dryer with 2 special care programmes

AEG

24 wash programmes, including two special care programmes: **Wool-Cradle** and **Easy Iron. Quickwash** time-saving 30 minute mini programme. 2.25 kg wash and dry programme for cottons. **Extra rinse** option for young or sensitive skin. **BIO wash phase** maximises the performance of enzyme-based detergents. **VARIOMATIC®** spin cycles minimise creasing for easier ironing. 1200 rpm spin speed with reduction options to 900/700/500 rpm. Door opens instantly on completion of cycle, preventing creasing.

'A' class wash performance. **Sensortronic foam detection** adds extra rinses if you have put in too much detergent, for perfect wash results.

Single knob, easy-read programme selection with 'one button/one function' operation. **Delay start** option. **LED display** showing programme stage and wash time remaining.

Capacity for 4.5 kg wash load or 2.25 kg drying load. Easy-access fluff filter. **Aqua Control** flood protection for total peace of mind.

Uses 40 litres of water and 0.9 kWh electricity for a 60˚C wash/spin cycle. **Condenser TURBO drying** with 2 temperature drying selection, reverse tumble action and cool-down phase to minimise creasing for easier ironing. Cold fill only.

CUSTOMER CARE

Responsive Customer Care/After Sales Service
Once you've bought an AEG appliance you're safe in the knowledge that in the unlikely event of a fault occurring you can rely on a commitment to look after your appliance throughout its working life. Over six hundred, fully trained service engineers are available nationwide and our complete care service is one of the most extensive and reliable available.

12 Months Parts and Labour Guarantee
In the unlikely event of any repairs being required in the first year, we will carry them out free of charge. In addition, any repairs carried out after the guarantee period are covered by their own 12 months guarantee.

Rapid Service or a Replacement
If you call us out under the 12 months guarantee, we endeavour to fix the appliance within seven working days of our first call. If we fail, you can claim a replacement product free of charge.
